Re: Case-By-Case 112(g) MACT Application
Santee Cooper Pee Dee Generating Station
Permit No. 1040-0113, Florence County

Dear Ms. Forney:

On June 30, 2008, the Bureau of Air Quality (BAQ) received a Case-By-Case 112(g) permit application from Santee Cooper for the proposed Pee Dee Generating Facility. This application is being forwarded to your office as information regarding the overall permitting review process for this proposed source. This application is submitted prior to construction based on recent vacatur of the CAMR Rule. With the CAMR Rule no longer in place and due to HAP emissions for the proposed source being above the major source level and no MACT standard currently applicable for utilities, this Case-By-Case MACT 112(g) permit application is the required process to limit HAP emissions.

You will be informed of future decisions regarding this application and will have an opportunity to comment on those decisions.

Should you have any questions or comments, or if I can be of assistance, you can contact me at (803) 898-3831.

Sincerely,

Joe Eller
Engineering Services Division
Bureau of Air Quality
